

Understanding Emiza's integration landscape

Marketplace, storefronts and POS Integrations

Our integrations with eCommerce marketplaces help you manage inventory and orders across all your sales channels from a single unified dashboard. Once you connect your marketplace channels with us, you no longer have to manually enter inventory or block stock channel wise.

We help you in:

- **Error-free inventory control and order processing**
We provide you with an omnichannel order management system, which makes your inventory control and order processing easier and error-free
- **Growth in Sales**
We integrate with multiple channels, which helps you sell through these channels easily, thereby multiplying your online sales.
- **Increase in Profitability**
We know that blocking stock channel-wise implies blocking working capital, which is an additional burden specifically for low-margin retail brands. We enable an increase in your operational efficiency, sales, and inventory turnover ratio which will lead to an increase in your profitability.

Marketplace integrations:

Currently, we have our eCommerce marketplace integrations with:

1. Amazon (.in, .com, .co.uk, .ca)
2. Amazon Flex
3. Amazon FBA
4. Amazon Vendor Central - B2B
5. Amazon Vendor Central - Dropship

Shipping Integrations

Our shipping solutions help you connect your sales channels to shipping automation, saving you time, effort, and money involved in arranging logistics. Our application will pull your orders across all sales channels, provide predictive analytics, and simplify your order fulfilment by automating the shipping process using shipping carriers. We connect with shipping partners and provides seamless tracking and shipping label generation and pickups.

We help you in:

- **Error-free shipping**
We assist you with shipping large amounts of orders, at the click of a button. Error-free shipping provides better customer service, which in turn leads to brand loyalty in the long-term.
- **Reverse shipping**
We provide you with reverse shipping facility, incase your customers wish to return their products. The integrated shipping service will pick up the order, and the order quantity will be updated in our application.
- **Fast fulfilment**
We simplify your order fulfilment process, thereby ensuring that the orders are fulfilled quickly. Fast fulfilments provide better customer service, which in turn leads to brand loyalty in the long-term.
- **Prioritisation of shipping partners**
We encourage you to prioritise your shipping partners. For example, if you work with 3 separate shipping partners, fulfilled you can ensure that orders from a particular shipping partner are fulfilled first.
- **Accurate order tracking**
We connect your shipping partners via AWB numbers, so that you can track and manage every shipment easily. Providing you the facility to enter Prepaid AWB numbers speeds up your order fulfillment process.

Our Shipping Partners include:

1. United States Postal Service (USPS)
2. UPS
3. FedEx
4. FedEx Cross Border
5. FedEx Mailview
6. FedEx SameDay City

7. Shyplite
8. Shippigo
9. ShipDelight
10. Vamaship
11. ShipStation

ERP and Accounting

Our integration with accounting and ERP solutions has made managing your omnichannel business remarkably easy. Invoicing and tax calculation are now available as one-click offerings, which save you valuable time. You can streamline your accounting and save yourself the trouble of manually punching taxes and managing taxes.

What differentiates us from our competitors is that we provide a single-click integration with ERP solutions like Tally, Quickbooks, SAP, etc. For Quickbooks, the process can be completely automated. Since all sales orders and bills are automatically linked with your ERP tool, you not only save time, but also ensure 100% data accuracy.

We help you in:

- **Automating Tax Engine**

We help you automate the entire tax calculation process. For every order processed in the system, invoices are generated and tax is calculated. This also simplifies your GST filing process, saving you time, energy, and resources involved in the accounting process.

- **ERP integrations for speedy data transfer**

We have integrations with all major ERP solutions, which ensures you can transfer your data seamlessly, at the click of a button.

- **Providing Tax Report and Reconciliation**

We provide you with a tax report, which will tell you the exact tax amount you have to pay and the credit amount which can be claimed. We also provide you with a reconciliation report, saving you a lot of time and money while working on compliance issues.

Currently we are integrated with:

Not only this, but we also provide integrating custom ERPs on demand.
